Leading Sector, Pearson Correlation Analysis, GRDP

Abstract

This research aims to analyze GRDP according to Business Fields which influence the economic growth rate of Blora Regency. This research uses secondary and primary data. This research uses secondary data, namely Gross Regional Domestic Product (GRDP) According to Business Fields Based on Constant Prices for the 2013-2022 Base Year, GRDP. Secondary data comes from BPS (Central Statistics Agency), while primary data comes from Blora Regency Bappeda employees. Data was obtained using the documentation method. The data was processed using the Pearson Correlation Analysis technique using SPSS 20 to determine the strength or weakness of the relationship between the 17 business sector variables (X) and the GRDP variable (Y) of Blora Regency. Based on the results of the Correlation analysis, there are five sectors that are the base sectors in Blora Regency, the Financial Services and Insurance sector, the Government Administration, Defense and Social Security sectors, Real Estate and Wholesale and Retail Trade and Education Services. The Financial Services and Insurance sector has the largest level of closeness or correlation of 97.18% with a time

span of 10 years.

INTRODUCTION

An economic growth is said to be experiencing plants that increases when level of activities economic growth is higher than what was achieved during the period generally (Caska, 2008). The increase in economic growth can be caused by the creation of a society, good infrastructure, public services, and the basis of human life is increasing community feelings (Alfarabi et al, 2014).

Global economic growth was stagnant during the COVID-19 period. COVID-19 outbreak in the global economy has led to a crisis and is unfortunate. The total COVID-19 cases globally reached 164,669,749 and the death toll reached 3,412,157 on May 18, 2021 (www.worldometers.com accessed May 18, 2021). COVID-19 (Coronavirus Disease 2019) has a significant impact on many aspects of life, not just health and humanity, but also the global economy. Indonesia's economic growth in 2020 is quite strong, especially in the first half of 2020, but the impact of COVID-19 and the government's policy of social distancing (PSBB) for mitigation of COVID-19. The government's policy through various steps to strengthen the economy and overcome the impact of COVID-19, able to bring the global economy back to the stage in the second half of 2020 with just enough stability (Laporan Perkembangan Ekonomi Indonesia 2020 Bank Indonesia).

Impact of COVID-19 is not that significant for the Indonesian economy in the first half of 2020. On the other hand, efforts to improve the economy in Indonesia need to be done because since the first case in Indonesia started in early March 2020, COVID-19 is still spreading throughout the Indonesian territory. Until the end of December 2020, the number of COVID-19 cases nationally reached 743,198 people, which is the amount you're

nonnormalization of interest rates to bank policy in the United States.

The Central Java Economic Growth in the second quarter of 2022 grew 5.66% (yoy), increased compared to the previous quarter (5.12%, yoy), and higher than the national economic growth (5.44%, yoy). The positive growth rate indicates that the economic recovery in Central Java is still continuing. Meanwhile, the quarterly Proyeksi Domestik Regional Bruto (GRDP) Jawa Tengah's not growing by 1.42% (qoq), slower compared to 1.75% (qoq) in the second quarter generally.

Graphics 1. Central Java Economics Growth

The economic growth in Java Tengah is just below the national and the Java region. The highest economic growth on the island of Java occurred in East Java (5.74%; yoy) and well in DKI Jakarta (5.20%; yoy). Based on its contribution, Jawa Tengah contributed 8.98% to the national economic growth or 14.38% to the Javanese region, and became a province that contributed four largest in the national and the Java region, namely DKI Jakarta, East Java and West Java.

Belgrack or not Elkolnolmi a region, can dikelyou knowlrbased on power belli society. Power belli this society is what it islbut deljust indicativer. So indicativerelkolnolmi one of its functions is mellook atlwhich way is elkolnolmi belgrack. One of the indicatorslrelkolnolmacro noodleslwhich is quite pelting is a ProlDuk DolmelRe sticklGiolnlal Gross(GRDP). GRDP sell can use rough

methods describe the good and bad economic a region and can also describe the meaning of a region. From this GRDP figure, the distribution can be derived describe the structure economic region. Based on BPS Pro Statistical Data Java Tengah 2023, Sumber Daya Manusia GRDP growth tahun-tahun terakhir melaju 1.27%. Selain itu Cumulative GRDP from 2019-2022 Q3 tertinggi is from Perekonomian Indonesia sebesar 33.94%.

Menurut BPS Kabupaten Blora Tahun 2022 tercatat GRDP on the basis of prices sebesar 30.9 Triliun and GRDP based on Konsumsi Rumah Tangga sebesar 18,61 T, terdapat empat bidang yang paling besar yaitu Pertanian, Perikanan, Perdagangan Besar dan Kecil, dan Jasa. Sektor yang paling dominan adalah Jasa yang memberikan kontribusi terbesar terhadap GRDP Kabupaten Blora, maka dari itu penelitian ini.

This research is done based on the latest factual data in the form of fact analysis study of GRDP according to the business sector that affects the economic growth of Blora, for the development of the district head of Blora to a significant level. This is a map for building the economic of Blora who continued to improve and the third regional direct implications that get the economic of Blora good macro and micro level the existence of upgrade the community feeling will be better measurable and significant.

RESEARCH METHODS

SCOPE OF STUDY

This study makes it a good study with quantitative properties regarding Factor Analysis-factor GRDP according to the Business Field that affects the Speedplant Economy Regency Blora and Mengidentifikasi faktor-faktor yang mempengaruhi pertumbuhan ekonomi Regency Blora. Object of this study is the behavior of the economy in the Regency Blora which is thought to be significant in moving the economy of Regency Blora.

JENIS & SUMBER PEDATA COLLECTION

Data used in this research is data from the data that refers to the Lapo Bookran ProDuk DomeRe stickGiofinal GrossDistrictn Blora according to Business Field 2013 – 2022 which was released by mego through website Bureau District Statistics Center Blora. Data type is just how to do it follow. First, study library just my way to learn various literature of the writings that relationship just solve the problem. Two, study documentation for getting data from the Central Statistics Agency (BPS) Pro District Blora, selected data is the appearance of a Lapo Bookran ProDuk DomeRe stickGiofinal GrossDistrictn Blora according to Business Field 2013 – 2022 which was released by mego through website, data - data 17 Sektor Base (Agriculture, Forestry, Mining and Quarrying, Industrial, Electricity and Gas, Water supply, Waste and Recycling Services, Trade, Accommodation and Food services, Transportation and Storage, Information and Communications, Finance and Insurance, Real Estate, Services, Administration, Health and Social work, Other Services) and GRDP. To get to know the variable relationships independent against variables dependent is used Pearson Correlation Analysis that's all software SPSS 20 for the data field.

TECHNIQUE ANALYSIS

Pearson Correlation Analysis

Model of relationship Pearson is used for the relationship 17 sectors base and district GDP Blora.

Koefisien korelasi Person is one of the before is for measured correlation for two variables X and Y are the both of them have level measure internal, can be calculated just use the product moment or

Product Moment Coefficient (Pearson's Coefficient Of Correlation) the dikethink about it oleh Karl Pearson (Abdurahman, 2011). Koephysien korelasi product moment can be purchased oleh dejust the formulalike befollowing:

$$r_{xy} = \frac{N \sum XY - (\sum X) \cdot (\sum Y)}{\sqrt{[N \sum X^2 - (\sum X)^2] \cdot [N \sum Y^2 - (\sum Y)^2]}}$$

Dejust penjeweld:

$r_{xy} = k$ valueorelation between variables x and y are the *correlation coefficient between x & y*

n = Number of samplesel peneNumbe litianrs of *samples*

$\sum X$ = Amount tosedecay of variable valuesl X Numbeers of *thetotal amofor of*

$\sum Y$ = Amount tosedecay of variable valuesl Y Numbeers of *thetotal amofor of Y*

Ko Valueephysien korelasi r beranges between -1 to +1 dejust a critiqueria pebenefits selike befollowing:

- If the value of $r > 0$ means tethat's itthere is a linear relationshiprpopositive, that is, increasingly besar variable value x is getting betteralso the variable value y .
- If the value of $r < 0$ means tethat's itthere is a linear relationshipr negative, that is, getting to cil variable value x is getting better sar variable value y
- If the value of $r = 0$, it means there is no relationship with setimes between varieAbel x dejust variables y
- If the value $r = 1$ or $r = -1$ it means tethat's itthere is a linear relationshipr seperfect is bestraight line, seAnd for increasing r valueslead toThe number 0 means the line is less straight.

RESULTS AND DISCUSSION

KO ANALYSISRELASI TIMES.ERIES THE ME FIELD OF BUSINESSMPEINFLUENCE THE RATE OF PEPLANTS EKONOMI DISTRICTN BLORA YEAR 10 YEARS TEEND

Bebased on my pricenstan 2010, District GRDP valuen Blora in 2022 meexperiencing peincrease. Pete increasereBut dipeinfluence oleh methel level is production in almost seentire business field seacompaniment dejust recoveractivities ekonomi, without any peinfluence from torising prices (inflation).

Regency GRDP valuen Blora in 2022 on the basis of ko pricesnstant 2010 mereached 18.61 trillion rupiah. Te numbersrsebut meincreasing from 18.12 trillion rupiah in 2021. Dein other words selong 2022 tehappened peplants ekonomi sebesar 2.68 persen, sea little bit meslow setethat's ityear sbenot yet growingbesar 3.68 persen.

PeThis delay is necessaryBabkan KategoRi Permining and PemineI experienced intraction up to -7.86 persen. KategoRi is very dominan in pembedetermine district GDPn Blora, rise/fall of kategoRi this will memake an impactsar tefacing peplants ekonomi Blora seway toshedding.

Meskip meNdomination, number of tedragon kethe te rjaget involved in sektor Permining and Peexcavation is not selots of sector Peagriculture. PeYou need to look at the speedplants ekonomi Blora without Migas for memperoleh pe overviewrkembangan ekonomi Blora yang lemore real. Pace peplants ekononoodles without Migas Blora 2022 sebesar 5.95 persen, up from 3.19 persen in the year sebegenerally.

Peplants ekonomi terbesar achieved oleh Transpo business fieldrtation and Pewarehouse, namely sebesar 52.31 persen. Pete plantsrsebut one of them is Didorong oleh has been maderbolethat's rightreturn to my ASNdo peofficial travel and WFOwhich has been givendo peNoah. Sethat's something elsestarting early 2022 PembeFace-to-face lessons have also started to take placelar. FactrpeNdrothe other one istaste of efek follow mebetter activitiesektor tourism.

Peplants ekonomi terhigh totwo and tothree achieved oleh Business Field PeNyeDiaan Akomotie and Eating and Drinking; serta Other Services that grow each sebesar 15.49 persen and 9.62 persen. BeThe next business field that will grow quite significantly in 2022 is Kose instructionsbesar 8.32 persen, tothen PE Servicescompany (6.21 persen) and PeProcurement of Electricity and Gas (5.22 persen).

For other business fields, I haveexperiencing pemy plantsski under five persen. Business field Peagriculture, Keforest, and Perikanan yang dominan ketwo in the District's GRDPn Blora, in 2022 it will only grow 2.66 persen.

Regency BPS datan Blora mestate that bebased on my pricenstan 2010, GRDP figures also increasedexperiencing peincreasing from 18.13 trillion rupiah in 2021 meto 18.61 trillion rupiah in 2022. This is meshow selong 2022, Regencyn Blora meexperiencing peplants ekonomi sebesar 2.68 persen, sea little bit meslower than last yearbeusually it growsbesar 3.68 persen. Berbeda deonly a year agobewhere do you know?plants ekonoNoodles are eaten a lotinfluence oleh rising prooil and gas production, this year peincrease in GDP disebabkan oleh methe level is production in almost seentire business field seaccompaniment dejustamount of pelolbudget towisdom in 2022. Behe saidranan bevarious business fields ekonomi in memproproduction of goods and services is very stimulatingnedetermine the structure ekonomi some daerah. Structure ekonoMi yang terbefor the added value created oleh seevery field of businessdescribe sebewhy?sar ketedepend on a daerah teface toable to berproduction of seevery business field.

Regency BPSn Blora too metake notesfive years agofinal (2018-2022) pe structurerekonoMian Regencyn Blora didomination oleh three kategori business field, namely: Peagriculture, Keforest, and Pefishery; Permining and Peexcavation; serta Petrade Besar and Eceran, ReParas Mobill, and Sepeda Motor. This can be seen from pethe role of each business fieldfacing pembedetermine district GDPn Blora.Same hereonly 2021, you knowcontribute terbesar in pembedetermine district GDPn Blora In 2022 is Pe Business Fieldrmining and Peexcavation, namely mereached 27.41 persen (up compared to 2021 sebesar 24.22 persen). Tofollowed by Pe Business Fieldagriculture, Keforest, and Perikan sebesar 20.83 persen (medown from 22.38 persen in 2021), serta Petrade Besar and Eceran, ReParas Mobill, and Sepeda Motor sebesar 14.57 persen (down from 15.47 persen in 2021).

Domina kategoRi Permining and Peexcavation was not followed by dejust do itmina peNyerapan tedragon kerja. Kategori peagriculture that sete real waythat's meNyerap tedragon kerja is the bestsar. Unfortunately toteit dependsabout the weathermake peplants sektor this is difficult to docontrol it.

Kategori lain yang saya harapkan bisa bekerja dengan baik dan dapat memberikan kontribusi dalam pertumbuhan GRDP di Blora adalah kategori industri. Industri lain yang besar di Blora akan membawa perekonomian Blora semakin lebih baik.

Regency BPSn Blora meNote ReParas Mobill and Sepeda Motor Sefive years agoFinally, Pe's business fieldtrade Besar and Eceran; ReParas Mobill and Sepeda Motor membeRikan koquite a contributionsar which is between 14 to 16 persen for perekonomian Regencyn Blora. In komposide of GRDP on the basis of prices bevalid in 2022, KategoRi is meI'll bentributor terbesar kethree setethat's it, KategoRi Peagriculture, Keforest and PeRikanaan and KategoRi Permining and Peexcavation.

In 2022, the contribution of the retail trade sector is reached 4.51 trillion rupiah or as big as 14.57 percent. Although the contribution of the retail trade sector is experiencing a decrease compared to last year, the retail trade sector is still growing against the background of a slow pace of plant growth this as big as from 4.92 percent in 2021 to 4.06 percent in 2022.

The COVID-19 pandemic in 2020 was followed by just another global issue, a little bit of change in society in the global trading activities. Society is better explained outside the day compared to the external market. Although, market expectations will be stimulated by the pandemic's control since early 2021 and finally the Russia-Ukraine war has pushed various business fields, dominant in the Blora Regency. The look at the backup to the increase in trading activity in society. This is reflected in the four GRDP. The best relationships are continued to be related or correlation is the Big Trade and Retail Trade only GRDP, seen from the figures of the relationship is 0.957 or 95.73%. The coefficient of correlation is positive, meaning an increase in Big Trade and Retail Trade will be followed by an increase in GDP. There is a significant relationship between Big Trade and Retail Trade with GRDP, marked by the significance (2-tailed) as big as 0.0000138.

5. PE Services Education

PE Services Education covers the education activities starting from the PAUD, TK, SD to Higher Education. This includes courses, pesantren and Park Al Qur'an education (TPQ). In 2022, PE Services Education contributed as big as 5.50 percent of the total economy of Blora Regency. The contribution is increasing from 1.64 trillion rupiah in 2021 to 1.70 trillion rupiah in 2022. The long distance lessons were reduced and returned to normal since the beginning of the COVID-19 pandemic. PE Services Education is over the normal. That's what I experienced in 2020 (-0.24 percent) like the impact of the COVID-19 pandemic, this business field is starting to show activity meaning it's not yet. Based on Table 4.2. RESULTS OUTPUT 2013-2022 (10 YEARS) show the best relationships are continued to be related or correlation is PE Services Education only GRDP, seen from the figures of the relationship is 0.955 or as big as 95.48%. There is a significant relationship between Transportation and Warehouse with GRDP, marked by the sig(2-tailed) sebesar 0.01140.

Kate's contribution of Transportation and Warehouse reached 918.82 billion rupiah or about 2.97 percent of the Regency GRDP in Blora in 2022. This contribution increased compared to last year as it usually reached 569.69 billion rupiah. Transportation and Warehouse look like the hottest sector in the Regency of Blora in 2020. In that year, the sector experienced a contraction of -21.08 percent or a decline after five years ago compared to the previous year. Various factors limit the capacity of society because of the COVID-19 pandemic. The main factor is the contraction of Transportation and Warehouse in that year. In 2022, Transportation and Warehouse is capable of going up again. It's better to go that's how it is in the economy post COVID-19 pandemic. It gives a positive effect towards this business field. It is limited to two years and to return to normal community activities. It is to encourage plants in Transportation and Warehouse activities by 52.31 percent, a decrease in GRDP based on the price index in 2010 from 440.98 billion rupiah in 2021 to 671.64 billion rupiah in 2022. The plants in the sector are also affected by the Work From Home (WFH) on PE activities in the office and Distance Learning in the classroom. It is a Face to Face lesson.

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of Kate's analysis, five sectors that have a significant relationship with GRDP in Blora, Services, Money and Insurance, Administration, Melgroan, Pelresistance and Jamsols, Relat Elstat and Peltrade, Belsar and Elcelran, and PE Services, Education. Services, Money and Insurance have a level of tolerance or correlation of 97.18% after 10 years.
